PROEL: AX3210P 'AXIOM' LINE ARRAY
They say: after extensive studies and live experience Proel is proud to present the new Axiom loudspeaker series
Applications: Live concerts and fixed installations
Specifications & features: Passive, vertical array, 3-way full-range bi amp system. 2 parallel 10" woofers and one 2" coaxial compression driver. Woofers feature an ISV (Interleaved Sandwich Voice Coil) system and diecast aluminium basket with double ventilation. HF is internally divided into two subsystems: an annular 4" film diaphragm for the MF and a coaxially mounted 2" diaphragm HF. Vertical dispersion depends on array size, minimum suggested – 6 boxes. Damped fibreglass HF guide. Cabinet: internally reinforced 15mm Finnish birch plywood with a 6° trapezoid shape. Speakon connectors. Built-in suspension system (7:1 security factor, maximum 24 boxes).
